-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Allowable Subject Matter

1. The indicated allowability of claims 24-26,28 and 35 is withdrawn in view of the reconsideration of the claim language and the previously applied prior art.
2. Claims 2-13,15-22,29-30,32-34,36-40,43-49,60-69 are allowed.

Claim Objections

3. Claims 24 and 25 are objected to because of the following informalities: in line 9, "the number of packets" does not reference a number of packets elsewhere in claim 24. For claim 25, "the duration of a communication.." does not reference a duration of communication elsewhere in the claim. Appropriate correction is required.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 24-26,28 and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Laybourn, U.S. Patent No. 6,625,439, in view of Brunner et al.(Brunner),U.S. Patent No. 6,185,414.

Art Unit: 2686

Regarding claims 24-26,28 and 35, Laybourn discloses an accounting method for crediting an account associated with a network access node, comprising:

receiving a communication event message (i.e., reads on SMS message), wherein the communication event message inherently includes identification data (i.e., inherently SMS messages are addressed for delivery) representing a network access node, wherein the communication event message is received in response to the network access node receiving and forwarding a data signal on behalf of a network user node(i.e., reads on device 10); and

crediting an account associated with the network access node based on the communication event message (col. 3,lines 45-58);

wherein the communication event message further includes a number of packets in the forwarded data signal (or a duration of a communication between the network access node and the network user node or is received in response to the network access node repeating the data signal in an ad hoc network) (reads information in tariff table and updating such) (col. 5,lines 66 to col. 6,line 32).

Laybourn fails to disclose wherein the communication event message is received in response to the network access node acting as an access point.

In a similar field of endeavor, Brunner discloses wherein the communication event message is received in response to the network access node acting as an access point (reads on switching node including call event generation means for continually generating real-time call event messages) (col. 2,lines 20-45).

Art Unit: 2686

At the time of the invention it would have been obvious to one of ordinary skill in the art to modify Laybourn to include call even generation means for the purpose of providing real-time debiting rate information (see Brunner, col.2,lines 40-45).

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joy K. Contee whose telephone number is 571.272.7906. The examiner can normally be reached on Monday through Friday, 5:30 a.m. to 2:00 p.m.
